\$77.5K	FY 2023 REVENUE	+25.9%	YOY GROWTH	97.4%
---------	-----------------	--------	------------	-------

Engagement Summary: Full financial health review for a California-based last-mile delivery company. Analyzed 18 months of transaction data across PayPal, Stripe, GoShare, Lugg, Curri, and bank accounts. Identified unit economics by delivery zone, revenue concentration risk (53% from one customer), and expense optimization opportunities. Delivered a 6-phase analysis with actionable recommendations.

	FY 2022	FY 2023	Change

Total Opex	\$79,300	\$47,700	-39.8%
Net Income	(\$19,200)	\$23,700	+223.5%

- Key Achievements:**
- Identified 3 of 8 delivery zones operating at a net loss due to incorrect pricing
 - Recommended zone-specific rate adjustments restoring gross margins by 15%
 - Flagged 53% customer concentration (GoShare) -- led to diversification strategy
 - Built 12-month cash flow model used to secure equipment financing
